

Small projects are defined as those that involve less than one cubic yard of disturbed soil. Examples include landscaping, gardening, fencing, etc.

Is a Panhandle Health District (PHD) Permit Required?

No. However, should the homeowner wish, the work will be inspected and recorded in the database maintained to assist with land transactions. The owner will be provided with a Record of Compliance (ROC).

ICP Services:

Education:

Provide information on contaminants of concern and how to avoid exposure. Assist during barrier replacement selection or installation

Clean Soils:

Panhandle Health District (PHD) will provide clean soils to site residents for small projects involving the removal of less than one cubic yard of material.

Soil Collection & Disposal:

PHD will provide containers for and collect contaminated soil for disposal or will arrange homeowner access to the disposal site.
